Paces and session guide

RACE PACE

9:00/mile / 5:35/km

The pace you need to run close to 28 minutes.

TREADMILL EQUIVALENT

6.7 mph / 10.7 km/h

Useful for controlled indoor efforts.

400M SPLIT

2:13 at race pace

Use roughly 2:12 for the sharper 400m reps.

800M SPLIT

4:27

Target split for 800m repetitions.

Breakeven sessions

These maintain fitness, support recovery and prepare you for the breakthrough sessions.

Steady / easy run

Easy running should be no quicker than 11:00/mile. Aim somewhere around 11:00-11:30/mile.

Long run

Keep the long run under an hour and avoid worrying about pace.

Fartlek

Unstructured speed play. Use it to practise changing gears without obsessing over exact splits.

Breakthrough sessions

These are the hard sessions that move you toward the target. Treat them as mini-milestones, not ego tests.

400m reps

Run around 2:12 per 400m at roughly 8:50/mile pace with 60 seconds standing recovery.

800m reps

Run around 4:29 per 800m at about 9:00/mile pace with a 200m jogged recovery.

1km intervals

Hit roughly 5:37/km at about 9:00/mile pace with 90 seconds jogged recovery.

Hills

Alternate Kenyan hills and hill sprints to balance power and endurance.

How to use this plan

1. Start this plan when you can already run close to 9:00/mile for a mile or have a PB under around 30 minutes.
2. Run the 3 build weeks, then take the recovery week to let the work land.

TRAINING PLAN

3. Repeat the 4-week cycle if you need more time before your goal 5k.
4. After 2-3 months using the plan, take a couple of low-key weeks with easier running and more recovery.
